### **MyWay Digital Health Ltd – Job Vacancy**

Job Title:	Technical Delivery Lead
Salary:	Up to £55,000 commensurate with experience; wider employee benefits and micro-share options are an aspiration that we wish to implement at an appropriate point in our growth
Duration of Employment:	Permanent, with options for flexible working upon successful completion of the probationary period
Location:	Edinburgh or Dundee

#### **Job Purpose**

Responsible for technically leading the development team, managing a team of software developers, and ensuring the successful delivery of high quality software. This role will be split between introducing industry best practices into the technical team, with a hands-on development and mentoring role with the other developers. You will be reporting to the Management Team, while taking Strategic direction from the CTO.

Key attributes include excellent people, communication and organisational skills, a keen eye for elegant design, usability and software quality, as well as a passion for making the system as good as it can possibly be.

Your tasks will include but not be limited to:

- Implementation, maintenance and management of agile processes, and looking for opportunities to introduce industry best practices such as

Continuous Integration and Deployment. Overseeing the full development lifecycle from the receipt of requirements, through bug and issue resolution to software release and maintenance.

- Setting technical direction and priorities for the team, currently comprising 3 developers, ongoing recruitment for 3 more (including this post), plus the potential to expand further in the coming months.
- Hands-on programming tasks relating to our award-winning diabetes platform, comprising web application, database, web services and mobile app, primarily based on the Microsoft technology stack.

The post requires a commitment to travel between Edinburgh and Dundee on a regular basis, plus other travel as dictated by project work.

## **Skills and Experience**

### **Essential**

- Good degree in computing or relevant discipline
- Experience in working in an agile environment that is successfully using Test Driven Development.
- Evidence of your role in all of the tasks outlined above
- 5+ years' experience, including most/all of the following:
  - HTML 5
  - CSS 3 and bootstrap
  - Responsive web design
  - JavaScript
  - jQuery
  - SQL
  - ASP.Net and MVC using C#
  - REST API
  - Web Services
  - OAuth authentication
  - PHP 5 or greater
  - MYSQL
  - Subversion
- Development and maintenance of SQL Server databases

### **Desirable**

- Experience working in IT within the health sector
- Good knowledge of Information Governance issues within the health sector

### **Person Specification**

- Positive outlook
- Motivated

- Proactive
- Flexible
- Pride in your work
- Keen to make a difference
- Ownership of tasks
- Able to work independently or as part of a team
- Excellent inter-personal skills

## **About Us**

MyWay Digital Health Ltd is a start-up that spun-out of the University of Dundee in January 2017 with the aim of commercialising the existing and highly successful MyDiabetesMyWay website into other parts of the UK and overseas.

Vision: Transforming Diabetes Care

Mission Statement: Improving the lives of people living with diabetes through data driven technology solutions

This is an incredibly exciting time to be joining the company and the possibilities are almost limitless for the right candidate. The technical team currently comprises of 3 developers, with ongoing recruitment for 3 more (including this post), plus the potential to expand further in the coming months. The existing team are friendly, positive and keen to make a difference.

Please send a cover letter and your CV, totalling no more than 3 sides of A4 and in standard size font to [info@mywaydigitalhealth.co.uk](mailto:info@mywaydigitalhealth.co.uk), to arrive no later than Weds 24<sup>th</sup> January, with interviews tentatively scheduled for w/c 29<sup>th</sup> January 2018.
