MyWay Digital Health Ltd – Job Vacancy

Job Title:	Web Developer
Salary:	Up to £45,000 commensurate with experience; wider employee benefits and micro-share options are an aspiration that we wish to implement at an appropriate point in our growth
Duration of Employment:	Permanent, with options for flexible working upon successful completion of the probationary period
Location	Edinburgh or Dundee

Job Purpose

Responsible for front-end development of our award-winning <http://www.mydiabetesmyway.scot.nhs.uk/> diabetes web application, as well as working closely with the rest of our technical team, helping to support database, web services, and possibly even our new mobile phone applications.

We are looking for a self-motivated person who is keen to promote best practices within our company, and being a key part of a collaborative team who are all responsible for troubleshooting, attention to detail, iterating processes, as well as recommending improvements to technical approaches, designs and architecture.

We have a CTO who will be setting the overall strategic direction, while you will be reporting to the Technical Delivery Lead.

The post will require regular travel between Edinburgh and Dundee on a weekly basis, plus other travel as dictated by project work.

Skills and Experience

Essential

- College or University degree, or equivalent combination of education and experience
- Extensive knowledge of C#, .Net, .Net MVC, ASP.Net, Entity Framework or Dapper, XML, JSON and MS SQL, using Visual Studio and Sql Server Management studio, as well as web user facing technologies such as HTML5, AJAX, JQuery and JavaScript.
- Experience in delivering responsive web sites, dealing with cross browser/platform compatibility issues.
- Knowledge of IIS configuration and hosting, as well as package management systems (e.g. Nuget) and version control systems (e.g. SVN)
- A strong commitment to exceptional client service;

Desirable

- Experience working in IT within the health sector
- Designing RESTful APIs and webservice
- OAuth authentication
- PHP 5 or greater
- MYSQL
- Subversion
- Experience in mobile development (iOS/Android Development)
- Working in an agile environment (e.g. Kanban or SCRUM)
- Test Driven Development
- Continuous deployment and Integration processes.

Person Specification

- Positive outlook
- Motivated
- Proactive
- Flexible
- Pride in your work
- Keen to make a difference
- Ownership of tasks
- Able to work independently or as part of a team
- Excellent inter-personal and communication skills

About Us

MyWay Digital Health Ltd is a start-up that spun-out of the University of Dundee in January 2017 with the aim of commercialising the existing and highly successful MyDiabetesMyWay website into other parts of the UK and overseas.

Vision: Transforming Diabetes Care

Mission Statement: Improving the lives of people living with diabetes through data driven technology solutions

This is an incredibly exciting time to be joining the company and the possibilities are almost limitless for the right candidate. The technical team currently comprises of 3 developers, with ongoing recruitment for 3 more (including this post), plus the potential to expand further in the coming months.

The existing team are friendly, positive and keen to make a difference.

Please send a cover letter and your CV, totalling no more than 3 sides of A4 and in standard size font to info@mywaydigitalhealth.co.uk, to arrive no later than Weds 24th January, with interviews tentatively scheduled for w/c 29th January 2018.
