Using EMIS Data Sharing Manager to enable MyWay Diabetes¹

This guide covers:

- Activating the MyWay Diabetes sharing agreement
 - Deactivating the MyWay Diabetes sharing agreement

Activate the sharing agreement

1. Review the Data Sharing Agreement, which is available via the Consent page here: https://mywaydigitalhealth.co.uk/gp-practice-consent-page/

Click estimation > Data Sharing Manager.

The Data Sharing Manager screen is displayed.

PRE-REQUISITE:	
To access Data Sharing Manager you will need the RBAC B0109 - Local Restricted System Administration	code

¹ 'MyWay Diabetes' is the generic name for a service that may appear with slight regional name variations, however these activation instructions remain the same regardless.

3. At the bottom of the navigation pane (running down the left hand side of the Data Sharing Manager module screen), check the tabs to locate the agreement (Care record, Data distribution or Reporting).

PLEASE NOTE:

Existing agreements of the selected type are listed in the navigation pane

- Active agreements have a green tick alongside
- Inactive agreements have a red cross alongside
