

# MyWay ★ Diabetes

## Information for Healthcare Professionals

An online platform that enables people with all types of diabetes (and their families/carers) to learn more and improve the way they manage their condition.

It is funded by the NHS and is free to use by anyone with diabetes across the region

## Key Features

- ★ Nine QISMET-accredited structured eLearning courses (type 1, type 2, gestational diabetes and diabetes prevention)
- ★ Public access information site (>200 resources including multi-language content)
- ★ Secure patient access to their own diabetes data, including:
  - Dashboards and graphs
  - Simple explanations to understand results
  - Tailored advice & support
  - Goal setting

***MyWay Diabetes HCP page gives more detail about the platform and links to local resources that you can use to promote the service to your patients.***

### Patient benefits

Patients develop a greater understanding of their diabetes, improve their self-management and have more informed discussions with their healthcare team, leading to better health and wellbeing and fewer complications.

### How do patients access the platform?

1. GP practice configures permissions, a one-off task, that takes 30 seconds – [instructions here](#)
2. Patients enrol using NHS login (no GP input needed). Registration [link here](#).

### How do I know if a patient has been referred to and/or has completed an eLearning course?

The MyWay Diabetes team sends monthly eLearning reports back to registered GP practices, including patient progress and SNOMED codes. Courses are accredited for both QoF and NDA reporting.
