

Vision

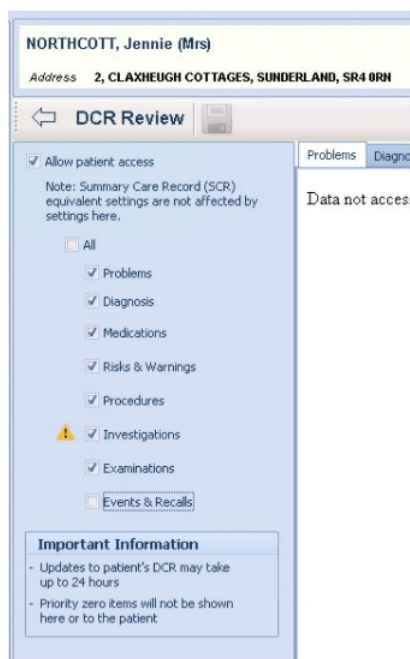

This [Vision Knowledge Base Article](#) gives a complete guide in registering patients for Online Services using the Registration module.

In the Online Services setup, the top-level permissions for the patient should meet or exceed those set at the practice level, although the practice level settings will take precedence when disabling options. This means a **minimum of Demographics, Summary Record and Detailed Coded Record are required.**

The granular permissions are then set up in the [Detailed Coded Record Review](#) patient app. All options must be ticked to enable correct data flow to Diabetes My Way, with the exception of Events & Recalls - this is optional.

A patient with the minimum settings looks like this:

Full details of what each setting includes are available on the [Detailed Coded Record Review](#) page and a preview of the data for that patient should be shown in the tabs to the right of the permissions.
